

The Expert Is In

**HAIRSTYLIST
NUNZIO SAVIANO**

The mane pro tells *Star* how to keep your hair healthy this summer.

1 Scalp itchiness and dryness can be common due to extreme heat or overexposure to chlorine. How can you calm those irritations?

Look for natural, cooling and soothing remedies like aloe vera and chamomile. Also, avoid wearing tight braids or ponytails and scratching your scalp.

2 Which shampoos and conditioners do you recommend?

Choose formulas designed to soothe and nourish the scalp, such as those containing tea tree oil or peppermint oil.

3 Are there any specific steps people should introduce into their daily routine now?

Wash hair more often and massage the scalp with a tool like the Revivv Stimulating Scalp Massager (this can help increase blood flow to the scalp).
